DATASET BACKGROUND

The dataset is a global retail company that operates internationally across 147 countries, which focuses on selling three product categories: Office Supplies, Furniture, and Technology. The Company operations span 7 markets (Africa, APAC, EMEA, EU, Canada, LATAM, US) across 13 regions and 1,094 states/provinces worldwide.

DATASET

Name	Description
Order_ID	Id of the transaction
Order_Date	Date order was made
Ship_Date	Date the ordered items were shipped
Ship_Mode	Shipping method
Customer_Name	Name of the customer
Segment	Segment of each customer
State	State the customer is located

Country	Country where the order delivered
Market	Geographic trading zone
Region	Geographical area within a market
Product_ID	Id of the product
Category	Category of the product
Subcategory	Subcategory of the product
Product_Name	Name of the product

Sales	Total gross revenue generated from the transaction
Quantity	Total units of the product purchased in the transaction
Discount	Discount rate applied to the order
Profit	Total net revenue generated from the transaction
Shipping_Cost	Logistics and handling expenditure required to deliver the shipment
Order_Priority	Urgency classification assigned to order fulfillment
Year	Calendar year extracted from the order date

Removed duplicate and null values. Rows reduced from 51,290 to 51,284.

OBJECTIVE

To evaluate business performance by analyzing sales and profit trends over time, identifying top-performing states and products based on sales, and comparing profitability across product categories. This analysis aims to identify high performing areas and provide insights into opportunities for improving overall business performance.

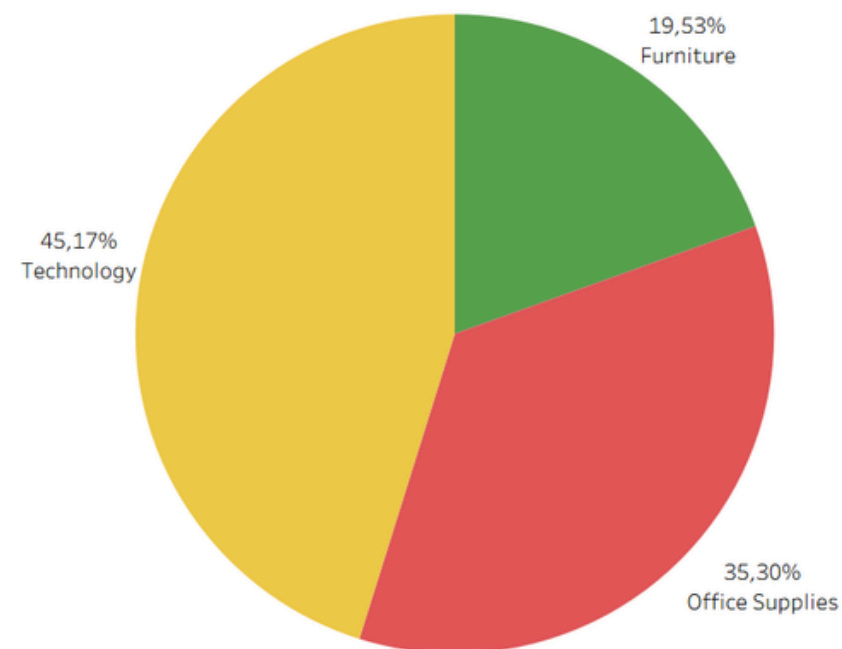

FINDINGS

The graph shows quarterly sales and profit trends from 2011 to 2014. Overall, sales and profit generally increased over the period, with quarterly sales rising from approximately \$335K in Q1 2011 to \$1.48M in Q4 2014. The data also shows a recurring seasonal pattern, with sales and profit tending to be higher in Q4 and decreasing in Q1 of the following year. However, Q1 performance generally improved from year to year, indicating that the business continued to grow despite the seasonal decline.

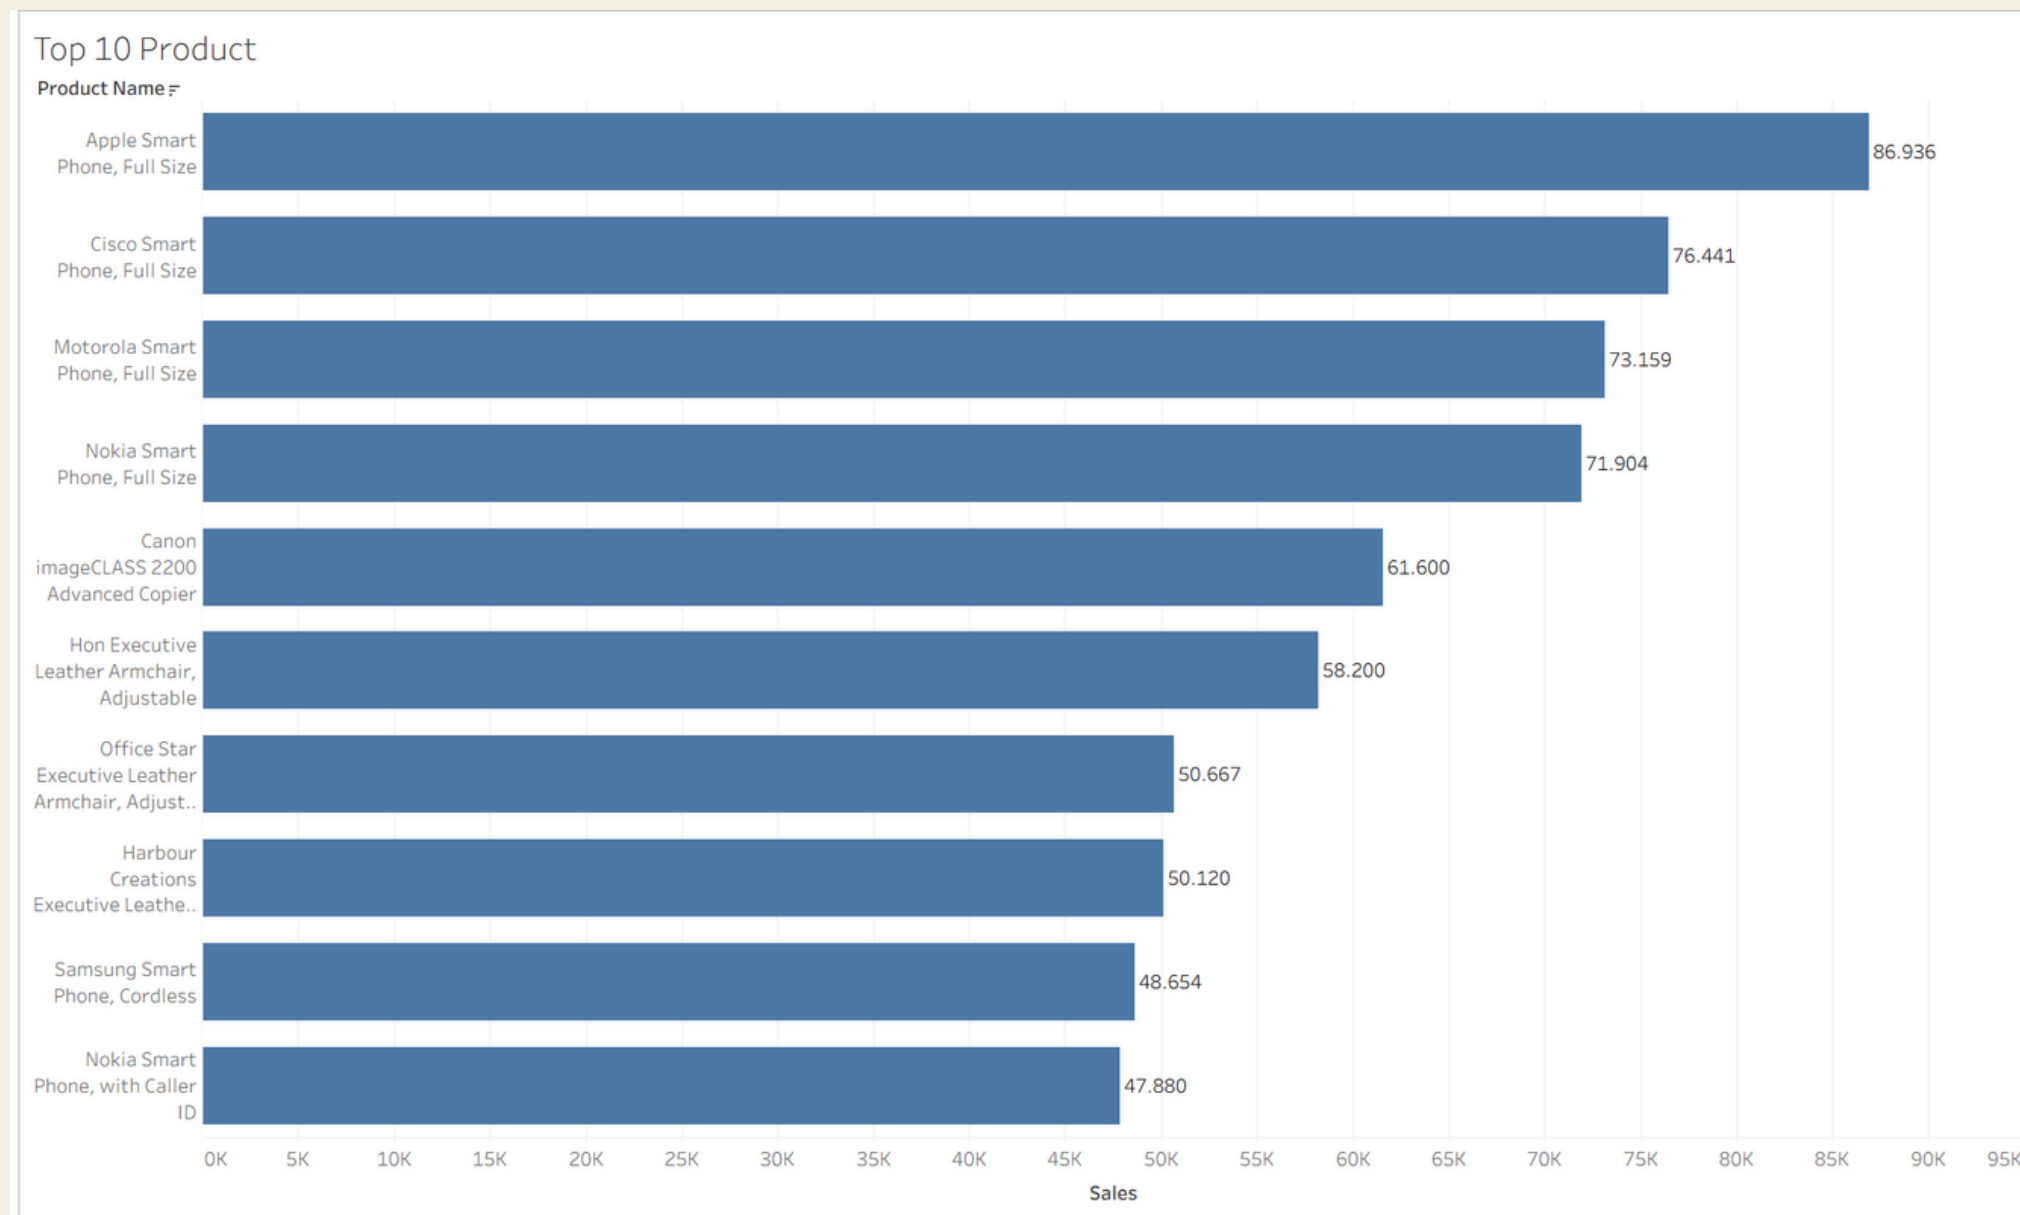

FINDINGS

Total Profit By Category

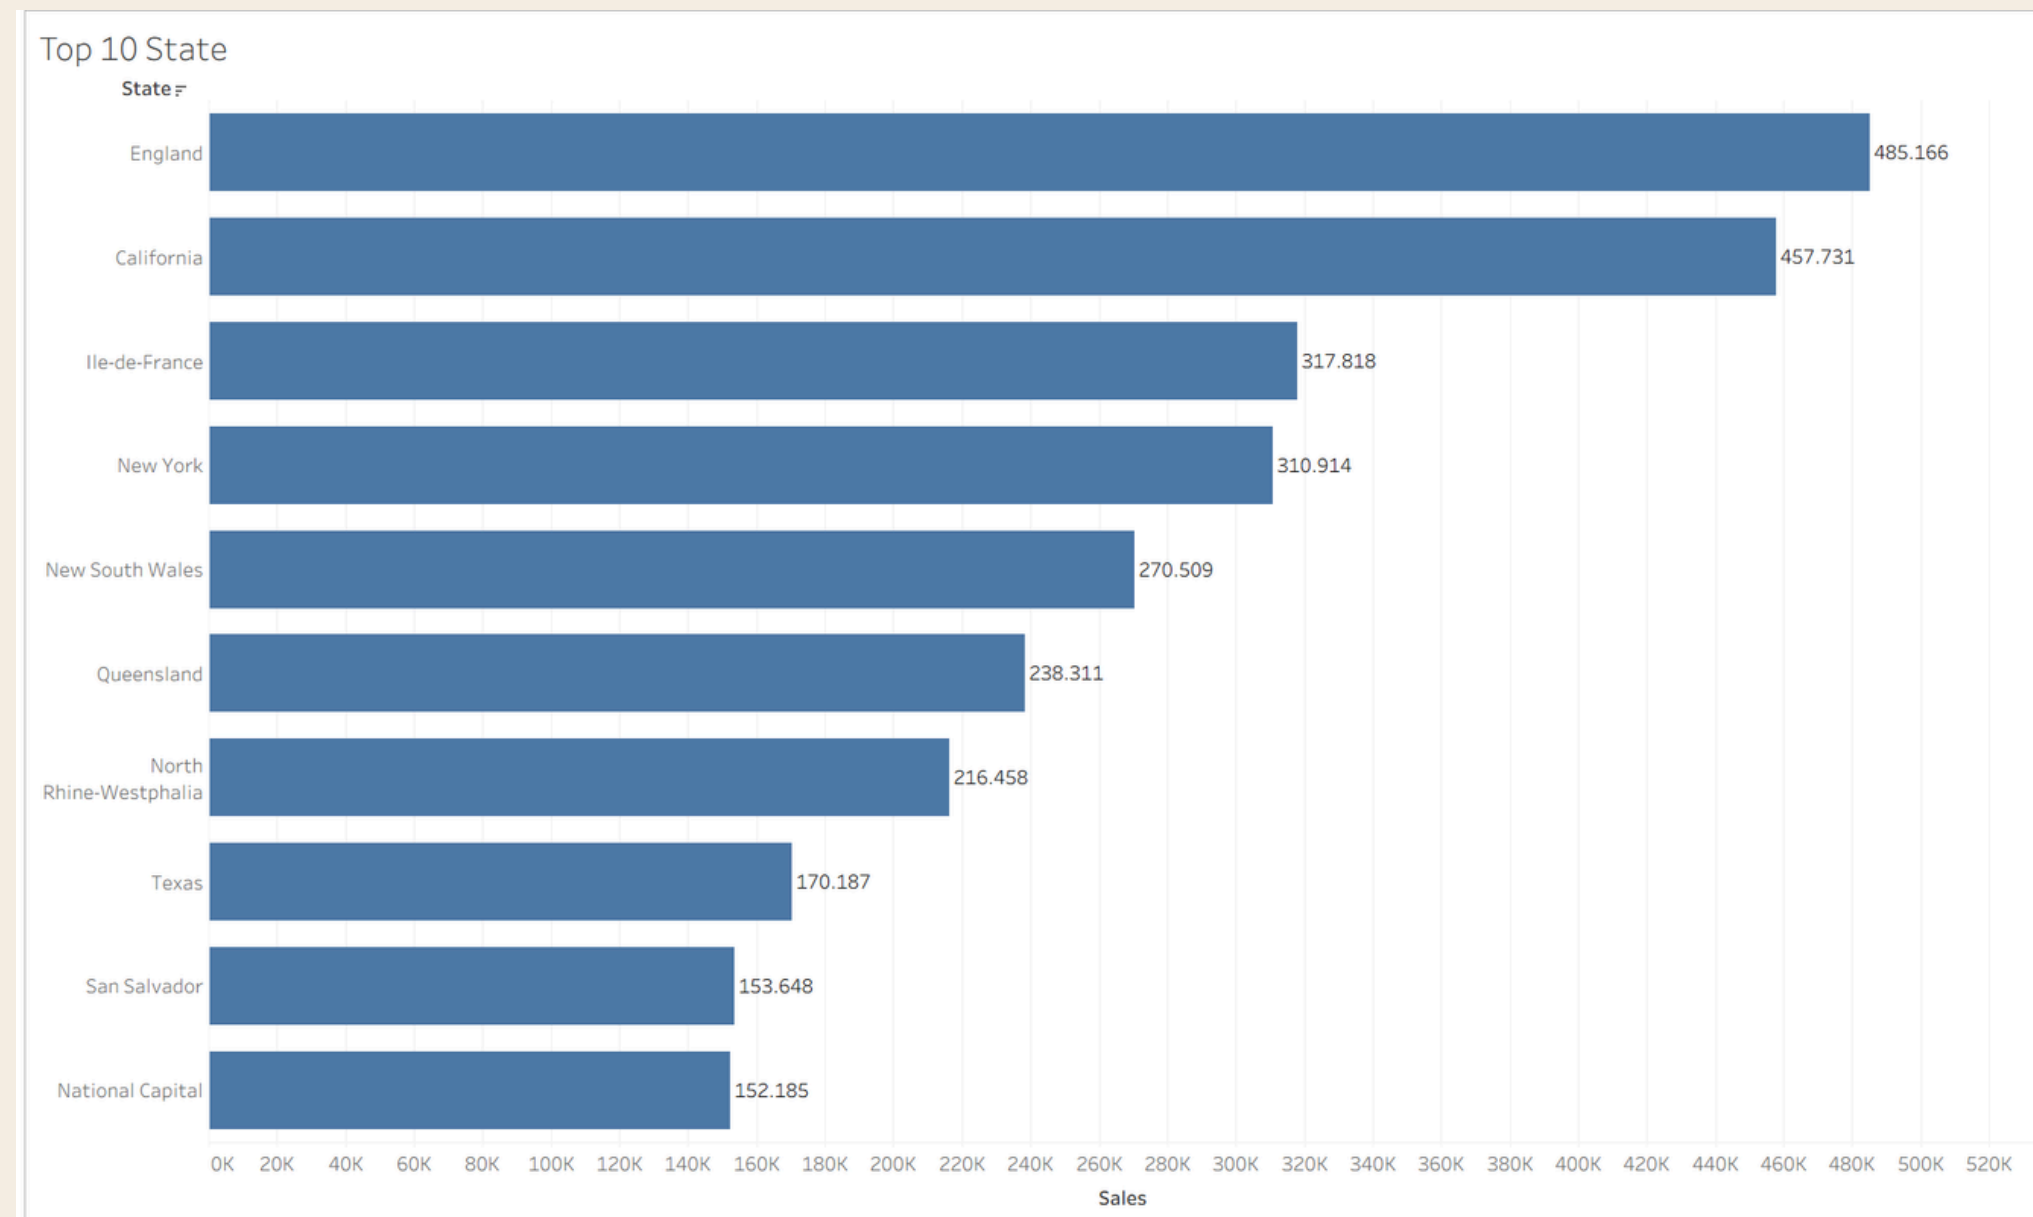

The pie chart shows the distribution of total profit across the three product categories. Technology contributes the largest share of total profit at 45.17%, followed by Office Supplies at 35.30%. Furniture has the smallest contribution at 19.53%. This shows that Technology and Office Supplies contribute more to overall profit than Furniture during the period analyzed.

FINDINGS

The horizontal bar chart shows the top 10 products based on total sales. Technology products appear frequently among the top-selling products, with the Apple Smart Phone, Full Size generating the highest sales at \$86,936. Other products in the top 10 include Cisco and Motorola smartphones, Canon copiers, and Executive Leather Armchairs.

FINDINGS

The horizontal bar chart shows the top 10 states based on total sales. England recorded the highest sales at approximately \$485K, followed by California at around \$458K. Sales were relatively concentrated among the leading states, with England generating more than three times the sales of the tenth-ranked territory, National Capital.

RECOMMENDATION

Prepare inventory and logistics capacity ahead of Q4 to handle the expected increase in demand and reduce the risk of stock shortages or delays

Analyze customer purchasing patterns around Q4 and Q1 to find ways to maintain sales after the seasonal decline and encourage repeat purchases

Continue monitoring Technology and Office Supplies, which contribute a larger share of total profit, while reviewing the performance of Furniture to better understand its lower profit contribution

Monitor the performance of top-selling products by comparing their sales and profit to identify products with high sales but relatively low profitability

Compare sales and profit across states to identify strong and weaker performing markets and better understand where there may be opportunities for improvement

THANK YOU
